STADIUM2 BATTLE

BASIC TRAINING

RENT OR OWN?

Rental Pokémon are inherently weaker than Pokémon you raise yourself in the various Game Boy® Game Paks.

Pokémon you raise from eggs will end up with the best possible stats. You can make it through the first Round of the Stadium Cups with the rental Pokémon, but it will be a struggle. Once you get to Round 2, you're going to need your own Pokémon to become the champ. We'll give you our suggestions, in both cases, for building a diverse team, but you're always welcome to bring along your favorites.

Use the 64 Transfer Pak™ to bring your own Pokémon into the game, and you'll be much better off.

STAT CHECK!

Be aware of your opponent's relative Special Defense and physical Defense stats, then use the attack you have that's more likely to hit them harder.

IF YOU'VE PLAYED...

the original Pokémon Stadium™, there are a few new tricks you need to learn. This updated version features lots of new Pokémon, new Trainers to battle against, a great Library and classroom area, awesome new Mini-Games, and lots of other extras. But best of all, the excellent gameplay you're likely familiar with from the original version has only been altered a little to allow for some new Combination Moves.

MOVIN' ON UP (OR DOWN)

Status-changing attacks are very useful to reduce your opponent's accuracy, lower their attack stats, lower their defense, etc. They're especially useful when you know you're going to take a hit, or you'll need to hit your opponent more than once to knock them out.

DIVERSITY IS THE KEY

The key to a good team is not only Pokémon of different types, but Pokémon that have attacks of different types. Keep in mind that an attack coming from a Pokémon of the same type will be stronger than that same attack from a different type. In other words, an Electric-type attack is more powerful when used by an Electric-type Pokémon than if it's used by a Pokémon that isn't Electric-type, but it's also less expected by your opponent.

Equip your Pokémon with an attack or two that's different than their type.

SHAKE IT UP!

Earthquake is a popular attack from many of the opponent Pokémon in the various cups, and it's a very strong Ground attack. Be sure to have a Pokémon on your team that is resistant to powerful Ground attacks like Earthquake, such as Grass, Bug or Flying type Pokémon.

Beware of the ground-shattering Earthquake attack!

MATCHMAKER, MATCHMAKER

If a battle begins and you notice your Pokémon is weak against your opponent, you should always choose to switch to someone stronger, even though your opponent will then be able to attack first. Better to save the mismatched Pokémon for a battle they can survive.

Often the attack your opponent will throw at your Pokémon before subbing out will be one strong against them, so try to sub in a Pokémon that can withstand that attack type.

PROTECT/DETECT

When an opponent has just executed the first part of a two-part attack (Solarbeam, Fly, Dig, Sky Attack), use Protect or Detect to prevent the attack from hitting you, or use a Fly or Dig attack yourself so you won't be in the line of fire when the second part of their attack is completed.

You can quickly turn a hard hit into a miss by using Detect or Protect to dodge them in mid-attack.

is completed.

WHAT'S YOUR TYPE?

Pokémon Types are the most critical stat to pay attention to. Use the Combat Type Chart in the inside back cover of this guide to compare the type of your Pokémon to your opponent. If you're strong against them, fight! If you're weak against them, sub out to someone stronger.

If you're strong against your opponent, your attack could have up to four times its regular strength.

SACRIFICIAL POKÉMON

If a Pokémon is weak and likely to be knocked out on the next hit, you may be better off letting that Pokémon get knocked out instead of switching to another Pokémon, so the next Pokémon you bring in won't have a guaranteed hit against them. The only drawback to this when fighting in the Stadium Cups is if you can win a battle without losing any Pokémon, you'll receive a continue that will be very valuable later in the cup when you're fighting tougher opponents.

Better to let a Pokémon go if it's almost gone, than to sub it out and make your next Pokémon take a hard hit.

Combination Attacks

THE WORLD FAMOUS ONE-TWO PUNCH... POKÉMON STYLE

Combination Attacks are a new feature to Pokémon Stadium 2. You can use one attack to set up for the second, making it much more effective. Several are mentioned in the Classroom, which we have reviewed here. There are others to discover on your own.

ACCURACY COMBO: Use Lock-On or Mind Reader, then a strong attack with low accuracy (like Dynamicpunch or Zap Cannon) and it will become more accurate.

ENDURANCE: Use Endure to guarantee you'll be left with at least 1 HP even if your opponent could knock you out, then use Flail or Reversal, which gain strength depending on how low your HP is (both will be super powerful). Or you can use Pain Split, which will combine your HP and your opponent's HP, then give half to each. You should only attempt these with very fast Pokémon, otherwise you could get knocked out before you have a chance to use the second half of the combo.

With Combination Attacks you can greatly increase your power using attacks of average strength.

RAIN DANCE AND SUNNY DAY COMBOS

There are several combos that begin with either Rain Dance or Sunny Day, and will make the follow-up attack much stronger. Both of these starting attacks will last for five turns, unless your opponent cancels it out with the other.

Changing the weather can greatly change the outcome of the battle.

With Sunny Day Fire becomes 1.5 times stronger and Water becomes half as strong. Moonlight, Morning Sun and Synthesis all recover twice as much. Two-turn moves, like Solarbeam, can attack in one turn. Thunder becomes about 50% accurate (normally 75%). Freeze attacks don't work.

After Rain Dance, Fire becomes half as strong and Water becomes 1.5 times stronger. Moonlight, Morning Sun and Synthesis only recover half as much. Solar Beam damage becomes half. Thunder is automatic (100% accuracy).

DEFENSE CURL/ROLLOUT

Geodude, Marill, Donphan and Phanpy are a few of the Pokémon that can put this combo to good use. Defense Curl raises your defense. Rollout is a Rock attack that lasts for five turns, with an increase in strength each turn.

RECOVERY COMBO

Use Belly Drum or Curse, which takes off half your energy, then use Recover or Rest to get energy back. Belly Drum maxes out Attack. With Curse, you cause your opponent to lose HP each turn. If you use Rest, you can follow up with Snore or Sleep Talk to attack your opponent while you're sleeping. Or use Awakening to wake up after you sleep, with HP recovered, and you'll be ready to attack.

CLASSROOM SKILL TEST BATTLES

In most cases, the key to choosing the best team of Pokémon is concentrating on their available attack types, not just the Pokémon's type.

THE NEW CLASSROOM ...

feature provides you with a stadium full of knowledge so you can quickly become a Pokémon master. Read through the lecture, concentrating on the checkmarked items that contain valuable information you'll need for the test. Take the Wisdom Test and pass with a score of 8 or more correct answers, then head for the Skill Test where you'll face off against multiple trainers to see if you can pick the correct three Pokémon out of six to choose from.

In this section we'll help you choose the right Pokémon and explain why, just in case you're having trouble or you want to review what you've learned. We've marked the best Pokémon with a gold star, just to make them feel special.

When you choose the correct three Pokémon and win the battle, you'll receive a star on that trainer. If you choose the wrong Pokémon and still win the battle, you'll see a fire symbol on that trainer and you'll need to battle them again with the correct Pokémon to earn your star for that lesson.

YOUR POKÉMON

Growlithe

Kabuto

Pupitar

Pidgeotto

Quagsire

Beedrill

The choice Pokémon for this first battle are Growlithe, Pidgeotto and Beedrill. These fire, bug and poison type Pokémon will put up the best fight against your opponent's Grass types.

YOUR POKÉMON

All of the opponent's Pokémon are Fire-types, and all your Pokémon are Normal-types. You want to pick the Pokémon in your team that have the best attacks that are powerful against Fire-types (Surf, Rollout, Earthquake).

YOUR POKÉMON

Your opponent has powerful attacks like Solarbeam and Skull Bash, so you want to pick Pokémon with fly and dig attacks.

YOUR POKÉMON

Their entire team is weak against fighting attacks, and some of them are weak against fire or grass. A team of Bellossom, Magmar and Hitmonlee will give you a well-balanced force to be reckoned with.

YOUR POKÉMON

Your opponent's Pokémon have strong normal physical attacks. The enemy's strength is their defense against special attacks, therefore you want to choose a team with strong physical attacks.

YOUR POKÉMON

Choose Dragonair, Pinsir and Murkrow solely for their special attacks of Seismic Toss, Dragon Rage and Nightshade. With these three attacks you can easily knock out all of your opponents, regardless of their type or defense.

YOUR POKÉMON

You want to pick Pokémon that have special attacks which can neutralize the playing field. Haze, Foresight and Swift will be useful against opponents that attack your stats.

Gym Leader Class

YOUR POKÉMON

Choose the only three Pokémon you have with damaging attacks (Waterfall, Thunderpunch, Dream Eater), then use those against your opponent's Normal-types.

YOUR POKÉMON

Start this battle with Primeape to knock out Murkrow, then use Poliwhirl or Politoed and the Belly Drum attack for the next two. This attack removes half your max energy, but maxes out your attack. Hit them with a ground attack, then Rest to recover all your energy.

YOUR POKÉMON

Use Surf (Wooper) against Fire, Poison (Spinarak) against Grass, and Electric (Mareep) against Water/Flying. Spinarak has a double defense advantage; the other two have double attack.

YOUR POKÉMON

Use Seadra's Twister against Dragonite and Golduck, even when they're flying. Use Lock-On/ZapCannon against Golduck and Skarmory. Use Magneton's eye-pleasing Lock-On and Electric attacks against Skarmory. Aerodactyl's earth-shattering Earthquake will quickly defeat any ground Pokémon, even if they Dig, plus its flying ability keeps it safe in the sky.

YOUR POKÉMON

Your opponent is strong against special attacks, so pick Pokémon that have strong physical attacks. Use Saryu against Ledyba and Ledian, but keep it away from Elekid. Use Normal attacks from Jynx and Mr. Mime against any of the non-bug opponent's.

Elite Leader Class

Gyarados Remoraid Muk Seadra Kingler Magcargo

YOUR POKÉMON

Pikachu Raichu Sandslash Cubone Marowak Shuckle

Both Pikachu and Raichu have the Light Ball item, but only Pikachu can use it (to increase its Thunderbolt attack greatly), so its a good pick. Cubone's Thick Club item will increase its Ground attack strength. Shuckle, with its Focus Band, can withstand many hits, making it ideal for wearing down the heavy hitters.

Machop Electabuzz Scizor Bellossom Primeape Pinsir

YOUR POKÉMON

Furret Scyther Raticate Houndoom Raichu Typhlosion

Speed is the key to winning this battle. All of your Pokémon have an attack (Endure) that will leave them with at least 1HP in the event of a strong attack, giving them another round to fight, but they'll only be effective if they can attack first. Start off with Scyther or Raichu and their special move of Agility to increase your speed. Use Agility on your first turn, then Endure on the second to retain at least 1HP. On your second turn, use the Fighting attack of Reversal to hit your opponent while they're defenseless. If it appears you can knock your opponent out with the next attack, use Reversal again. Otherwise, use Endure again to build up your Defense so you can survive your opponent's next attack.

Dragonite Arcanine Flareon Magmar Typhlosion Tyranitar

YOUR POKÉMON

Poliwrath Pineco Hitmonlee Golem Rhydon Steelix

Combination Attacks become a necessity in this lesson. They're new to Pokémon Stadium 2, and add interesting new strategies to how you train your Pokémon. Steelix has a combination that will match up against Dragonite; Poliwrath matches up with Tyranitar, and Golem can handle any of the Fire types you may encounter.

Starmie Slowbro Kingdra Golduck Octillery Staryu

YOUR POKÉMON

Gyarados Exeggutor Magmar Houndoom Jumpluff Dodrio

Once again the Combination Attacks come into play, but now you'll learn how to defend against them, too. Equip all of your Pokémon with a Paralyze Cure Berry, which you'll need if you're hit by your opponent's Rain Dance/Thunder combination. Use Sunny Day to rid the stadium of rain, only the three chosen Pokémon can do this move. Houndoom and Jumpluff have the Solarbeam attack, while Exeggutor has a similar Synthesis move. Either of these attacks make a devastating combination when used with Sunny Day. Use Synthesis to recover more HP than usual. Exeggutor is also the only Pokémon with Stomp, which is a perfect match for Staryu and Starmie's Minimize moves. Bust out Jumpluff against any of your opponent's Water-type Pokémon. Houndoom isn't especially useful, and is especially weak against any Water-types, but its the strongest of the remaining four, so its your final team choice.

own into battle. You may be able to survive the first round of cups using rentals, but for the second round you'll need the heavy hitters.

OUR TOP RENTAL PICKS

ABRA (Psychic)

We call it "the great finisher". It almost always attacks first, even as a rental Pokémon. It's great to save in the back of your team, to bust out when you've knocked out a few of your opponent's

Pokémon and have lost a few of yours. Abra can usually finish the job. It has a very strong Psychic attack along with a very high Special Attack stat, which makes it a powerful hit even if your opponent isn't weak against it.

SUNKERN (Grass)

This is one of our favorite new Pokémon. Sunkern has two different types of attacks, Grass and Poison, which makes it very versatile. It doesn't have the weakness of a dual type,

because it's only Grass-type, but it has the ability to use attacks of two types. It's strong against Ground-, Rock-, Water- and Grass-type Pokémon.

MACHOP (Fighting)

It has dual type attacks without being dual type, just like Sunkern. This makes it strong against Normal, Fire, Electric, Ice, Poison, Rock, Dark and Steel!

LARVITAR (Rock/Ground)

Larvitar helps balance out the team with its Rock/Ground-type. It's strong against Fire, Ice, Flying, Bug, Electric, Poison, Rock and Steel!

VOLTORB (Electric)

Voltorb is super fast, and has a super strong electric attack, which works great against the many Water- and Flying-types in this cup.

HORSEA (Water)

It has a strong water attack that comes in handy during several battles, especially against Ground-, Rock- and Fire-type Pokémon.

STADIUM TIPS

POKé CUP

YOUR CHOICES OF POKéMON

are a lot less limited from the Rentals in this cup, but it's still a challenge to put together a team that will carry you through the entire tournament. Our team below fared well, in the first round at least, and put up a good fight in the second round. Haunter is a decent rental substitute, with Ghost-type and Giga Drain (an awesome special attack).

THE MORE YOU KNOW...POKéMON FOR RENT?

You can check out the full list of Pokémon available for rent, and compare their attacks and stats, by checking the Rental Charts in this book. See page 74.

OUR TOP RENTAL PICKS

KADABRA (Psychic)
One of our all-time faves, Kadabra is fast, has a high Special Attack, plus Psychic and Thunderpunch attacks that are two of the best of their type.

ONIX (Rock/Ground)
Rock/Ground-type is practically a necessity in this cup, and Onix has speed and high Defense to boot. It also has the awesome Earthquake attack and Rock Throw.

HOUNDOUR (Dark/Fire)
Flamethrower and Sunny Day are a great Fire combo that can't be beat, and its Dark attack (Crunch) is great against Psychics and Ghosts.

MACHAMP (Fighting)
Machop's Submission is great against your opponent's countless Normal-types. Fire Punch and Thunderpunch round it out with a perfect balance of diversity.

ZAPDOS (Electric/Flying)
Zapdos is an excellent Electric-type with few weaknesses. Thunder and Detect are two of its best moves. It's also immune to the opponent's favorite move, Earthquake.

DEWGONG (Water/Ice)
Our resident Water type who also has a decent Ice attack in Aurora Beam. Its combo of Rest and Sleep Talk will let you attack while you're sleeping to heal.

BRING YOUR OWN...

The rental Pokémon are still weaker than what you can raise, so you're better off bringing your own into battle. Here's a list

of the Pokémon we'd rather bring into battle, along with their attacks. You're welcome to swap for your favorites.

ESPEON (Psychic)
Psychic, Shadow Ball, Swagger, Protect

RAIKOU (Electric)
Iron Tail, Dig, Thunder, Roar

MACHAMP (Fighting)

STADIUM CUPS

Machamp's Submission is strong against Piloswine, Golem, Clefable and Dewgong. Its Fire Punch is strong against Victreebel. Dewgong's Waterfall is strong against Piloswine and 4x strong against Golem. Dewgong's Aurora Beam is strong against Victreebel. Houndour's Crunch is strong against Hypno and its Flamethrower is strong against Victreebel. Dewgong has Safeguard, Encore and Icy Wind. Piloswine has Earthquake and Ice Beam.

Onix's Earthquake is strong against Weezing, Muk and Ampharos. Zapdos is strong against Vaporeon and Skarmory. Machop's Submission is strong against Milank, and its Thunderpunch is strong against Vaporeon and Skarmory. Miltank has Toxic and Earthquake. Weezing has Sludge Bomb. Ampharos has Toxic.

Dewgong's Waterfall is strong against Rapidash, Aerodactyl and Marowak. Onix's Earthquake is strong against Rapidash and Electrode. Kadabra's Thunderpunch is strong against Suicune and Aerodactyl. It has to put in Suicune or Electrode because of their levels and the maximum allowed combined levels of 155. Marowak has Earthquake, and Rock Slide. Suicune has Ice Wind. Electrode has Thunder Wave. Alakazam has Psychic.

Onix's Earthquake is strong against Gengar and Electabuzz, and its Rock Throw is strong against Dragonite. Houndour's Crunch is strong against Gengar and Starmie. Machop's Thunderpunch is strong against Starmie, and its Submission is strong against Snorlax. Pokémon Pedro can't have Snorlax and Dragonite in the same team/match because of the combined level limit of 155. Gengar has Confuse Ray, Night Shade, and Destiny Bond. Snorlax has Belly Drum. Machop has Cross Chop.

Machamp's Submission is strong against Granbull, Rhydon and Tauros, and its Thunderpunch is strong against Feraligatr and Fearow. Its Fire Punch is strong against Ariados. Dewgong's Aurora Beam is strong against Ariados and Fearow, and its Waterfall is 4x strong against Rhydon. Onix's Earthquake is strong against Rhydon, and its Rock Throw is strong against Fearow and Ariados. Feraligatr has Crunch and Leer. Tauros has Thunderbolt. Ariados has Leer and Giga Drain.

Houndour's Flamethrower is 4x strong against Scizor, and its Crunch is strong against Mr. Mime and Girafarig. Onix's Earthquake is strong against Arcanine. Machop's Submission is strong against Raticate and its Fire Punch is 4x strong against Scizor. She or Teacher Molly has to have in Scizor or Raticate because of the level limit (155 per team). Quagsire has Swagger and Surf. Scizor has Metal Claw. Girafarig has Double Team and Agility.

Dewgong's Waterfall is strong against Charizard, Typhlosion and Nidoqueen, and its Aurora Beam is strong against Exeggutor. Houndour's Flamethrower is strong against Exeggutor, and its Crunch is strong against Slowking. Onix's Earthquake is strong against Typhlosion and Nidoqueen, and its Rock Throw is 4x strong against Charizard. Blissey has Thunderbolt and Sunny Day. Typhlosion has Sunny Day and Flamethrower. Exeggutor has Solarbeam, Sunny Day and Synthesis. Slowking has Psychic and the Item "Leftovers."

Onix's Rock Throw is strong against all but Umbreon and Misdreavus, and its Earthquake is strong against Entei. Houndour's Crunch is strong against Jynx and Misdreavus, and its Flamethrower is strong against Jynx. Machop's Submission is strong against Umbreon and Lapras, and its Thunderpunch is strong against Crobat. Umbreon has Confuse Ray, Mean Look, and Psychic, so if you are planning to put your Fighting Pokémon in against this one, watch out. Entei has Fire Blast. Jynx has Blizzard.

STADIUM TIPS

PRIME CUP

THIS CUP HAS NO LIMITS

on your choices of Pokémon to bring into battle. It can be any Pokémon, up to Level 100.

We kept the same Rental Picks from the Poké Cup, since their diversity helped us survive that cup. We varied the team we brought in from the Game Boy Game Paks, but even the team used in the Poké Cup is diverse enough for this challenge.

THE MORE YOU KNOW...POKÉMON FOR RENT?

You can check out the full list of Pokémon available for rent, and compare their attacks and stats, by checking the Rental Charts in this book. See page 74.

OUR TOP RENTAL PICKS

KADABRA (Psychic)

One of our all-time faves. Kadabra is fast, has a high Special Attack, plus Psychic and Thunderpunch attacks that are two of the best of their type.

ONIX (Rock/Ground)

Ground/Rock type is practically a necessity in this cup, and Onix has speed and high defense to boot. It also has the awesome Earthquake attack and Rock Throw.

HOUNDOUR (Fire/Dark)

Flamethrower and Sunny Day are a great Fire combo that can't be beat, and its Dark attack (Crunch) is great against Psychics and Ghosts.

MACHOP (Fighting)

Machop's Submission is great against your opponent's countless Normal-types. Fire Punch and Thunderpunch round it out with a perfect balance of diversity.

ZAPDOS (Electric/Flying)

Zapdos is an excellent Electric-type with few weaknesses. Thunder and Detect are two of its best moves. It's also immune to the opponent's favorite move, Earthquake.

DEWGONG (Water/Ice)

Our resident Water-type, who also has a decent Ice attack in Aurora Beam. Its combo of Rest and Sleep Talk will let you attack while you're sleeping to heal.

BRING YOUR OWN...

The rental Pokémon are still weaker than what you can raise, so you're better off bringing your own into battle. Here's a list

STADIUM 2 BATTLE GYM LEADER CASTLE

THE GYM LEADER CASTLE

leads you through a series of battles similar to the Stadium battles for the various Cups. Several of the gyms feature Trainers you must

defeat on your way to the leader, similar to the Game Boy Pokémon gyms.

With each gym the difficulty increases slightly, until you reach the top of the Castle where you face off against The Elite Four Kanto Gym Leaders, some of the best Pokémon Trainers in the world.

This chapter will lead you through each battle, with a breakdown of the Pokémon you'll face, some of their attacks to watch out for, and which Pokémon we recommend to match up against them.

Once you beat the entire Gym Leader Castle, and all of the Stadium Cups and your Rival, you'll be faced with Round 2, where all of the Trainers become a little more fiesty, and their Pokémon are trained with new attacks and stronger stats. Good luck!

STADIUM TIPS

CHALLENGE CUP

& RIVAL BATTLES

Challenge Cup

CHALLENGE CUP PLAYS DIFFERENT

than the other cups. If you've gone through the Classroom Battles, then you're familiar with this format.

You'll be given a random collection of six Pokémon, as will your opponent. You must choose a team of three from the six.

The random team you receive for the first battle will remain the same through the entire tier or level you're on, so if you don't get a good team, quit back to the Stadium screen and try again until you have a balanced team you're comfortable using.

Luckily the battles here aren't too complicated — most of the Pokémon they provide randomly are diverse and even have special items. Just use all the knowledge and tricks you've learned from surviving the other cups and you should be fine.

OUR TOP RENTAL PICKS

ALAKAZAM (Psychic)

This rental features Thief, Psybeam, Future Sight and Kinesis. Give it the item Blackglasses for an extra boost of Dark power for the Thief attack.

VOLTORB (Electric)

Voltorb brings Thunder, Selfdestruct, Mirror Coat and Rain Dance to the battle. Add on a Focus Band to its item pouch and Rival will be shocked.

HOUNDOOM (Dark/Fire)

Ember, Bite, Swift and Roar are the attacks this rental Pokémon comes to the arena with, and you can add a Scope Lens to increase its chance of a critical hit.

ZAPDOS (Electric/Flying)

Zapdos is an excellent Electric-type with few weaknesses. Thunder, Rock Smash, Flash and Detect are provided, and you should add Quick Claw as an item.

ELECTRODE (Electric)

Can't have enough Electric-types in this battle. Electrode has Thunder, Swift, Sonicboom and Flash. Add the item Magnet for extra juice.

UMBREON (Dark)

Dark vs. Psychic, with Faint Attack, Quick Attack, Sandattack and Mean Look. Give it a Gold Berry and it's even more prepared for these battles.

Rival Cup

YOUR RIVAL will appear once you've completed all four Cups and defeated the the Johto and Kanto Gym Leader Castles in Round 1, and then again after Round 2 is conquered. He has three awesome Pokémon that may seem intimidating, but the good news is you get to bring six Pokémon into battle with you.

While his Pokémon overpower yours in the strength of their attacks, you can still get the upper hand. The secret is in using status-altering attacks that will reduce their accuracy and speed, and increase yours. This will close the gap between your Pokémon and his.

ROUND 1 BATTLE

THE RIVAL'S POKÉMON

LUGIA (Psychic/Flying)

Aeroblast, Psychic, Surf, Recover.
Item: Sharp Beak.

MEWTWO (Psychic)

Psychic, Recover, Hidden Power, Thunderpunch.
Item: Twistedspoon.

HO-OH (Fire/Flying)

Sacred Fire, Recover, Earthquake, Steel Wing.
Item: Charcoal.

Get ready for the final battle, this time against your Rival. He's packed with powerful Psychic- and Flying-types, so bring in some Electric and Dark.

WEAKNESSES: Electric, Rock, Dark

The first time around your Rival's Pokémon will be Level 50. Hopefully and most likely you will start up face to face with either Lugia or Ho-oh. If not, and you start off fighting against Mewtwo you should quit and restart. Once you have one of the legendary birds against you, start off with Voltorb because it's fast and has Rain Dance. If you can survive to get off one move, that's good. All you want to do is use its Rain Dance, which will make your Thunder hit with 100% accuracy. If you survive for a second attack with Voltorb, use Thunder to get a good shot in before you faint.

Next, bring in Electrode. It's faster than all three of your Rival's Pokémon, so at least it'll get off a good shot on Lugia or Ho-oh. By the time you reach your third pick in either Zapdos or another Pokémon with Thunder, hopefully Lugia is out and you are working with Ho-oh. Ho-oh is the slowest of this group but is still pretty fast. As long as you can get a good shot or two of Thunder in there, or if you have a strong Rock move, you should be able to knock out Ho-oh since Electric moves are 2x strong against it and Rock moves are 4x strong.

Once you are toe-to-toe with Mewtwo, bring in Alakazam. Mewtwo only has Psychic, Thunderpunch and Hidden Power for attacks. Mewtwo won't use Psychic against you even though it does the most damage (at least, most of the time it won't, because it sees you are Psychic-type). If all things go well, you can beat Mewtwo by using your Thief attack. This should take away its item, too.

When you defeat your Rival the first time around, you'll unlock Round 2, and you'll receive a special Farfetch'd with Baton Pass, which it normally doesn't learn.

This is a great arena to practice matching various Pokémon against the big dogs.

ROUND 2 BATTLE

THE RIVAL'S POKÉMON

LUGIA
(Psychic/Flying)
Aeroblast, Psychic,
Earthquake,
Recover.
Item: Leftovers

MEWTWO
(Psychic)
Psychic, Recover,
Thunderbolt,
Submission.
Item: King's Rock

HO-OH
(Fire/Flying)
Sacred Fire, Thunder,
Earthquake,
Giga Drain.
Item: Quick Claw

The second time around you'll find Level 100 Pokémon in your rival's team, but you can bring the same level to the battle.

WEAKNESSES: Electric, Rock, Dark

After you earn all the Stadium Cups in Round 2 and have defeated the Johto and Kanto Gym Leader Castle, you'll be able to face your Rival again for a second match. He has the same three Pokémon, only they're now Level 100 and they've swapped out a few of their moves.

The first thing you should always do before a battle is to look over your opponent's weaknesses. Lugia and Ho-oh are Flying Types, so their weaknesses are Electric, Rock and Ice (though not Ice in Ho-oh's case, because it is Fire/Flying). The two Legendary Birds are dual-types, so they're vulnerable to other types, too. Lugia and Mewtwo are both Psychic-type, which leaves them weak against Dark, Bug and Ghost. Ho-oh is Fire-type, leaving her susceptible to Rock and Water attacks. (Fire is vulnerable to Ground, but since Ho-oh is Flying-type, it won't hit it.) Keep in mind that a Rock move will be 4x strong against Ho-oh, because it is both Flying and Fire.

In this battle we chose rentals to utilize the quickness of Electric-types and the strength that they have against Flying-types. Also we have the addition of Houndoom and Umbreon to defend against their dominating Psychic-types, by using attacks such as Bite and Faint Attack.

To round off this team we have Alakazam, a Pokémon with resistance to Psychic, but with a Dark attack in its bag of tricks.

You should start off with Voltorb. If by chance Mewtwo shows up to battle first, you should quit and start over until you can battle one of the birds first. Voltorb is your starter because you'll want to use Rain Dance to guarantee success with the barrage of Thunder moves that you are going to follow up with, as well as lower the impact of the Fire attacks from Ho-oh. Hopefully you can get off another attack with Voltorb, but if it is ousted, you should put in Zapdos next, and continue with more Thunder attacks. If Zapdos is taken out, move on to Electrode, who is the fastest Pokémon in this battle and will go first. Again, use your Thunder move and you should beat both birds without too much effort.

When going into the battle with Mewtwo, Electrode or Zapdos will have to be sacrificed until you can put in Alakazam. Use Alakazam's Thief to defeat Mewtwo. If by chance Alakazam fails, send in Umbreon or Houndoom to claim victory.

When you defeat your Rival the second time around, you'll receive a special Gligar with Earthquake, which it normally doesn't learn.

It may take a few tries, but even with rental Pokémon you can beat your Rival in both battles without too much effort.

It's super-effective!

MINI-GAMES

ANY FANS OF MARIO PARTY™?

You are going to love the improvements to the Mini-Games in Pokémon Stadium 2! They might as well call it Pokémon Party. Now there are more games, that are more fun, and there's an excellent Mini-Game Champion mode for up to four players, where you can play to earn from five to nine coins to become the champ.

There's also a Quiz For All mode, where one to four players can answer Pokémon trivia questions, but we're not going to ruin any of the answers here.

BRING YOUR POKÉMON ALONG

You can use the Transfer Pak with your Game Boy Game Pak to play Mini Games with Pokémon you've raised. You must use the same Pokémon that stars in that Mini Game. Look for the Pokéball icon to change on the instruction screen. Any coins you win in a championship can be used in your Game Boy Game Paks to play slot machines.

GUTSY GOLBAT

Grab the hearts and avoid the Magnemite and opponent Golbat. Sounds simple enough, but as the screen scrolls to the right, you'll be facing more and more Magnemite.

On impact with another Golbat, one or the other will lose hearts. The Golbat will glow to indicate powering up and then they have the

ability to steal hearts.

TOPSY-TURVY

You'll score a point every time you knock any of your opponents out of the ring, and you'll win the game if you score five points, or have the most points before time runs out.

you won't be able to spin again until you stop spinning, so save it until the moment before impact.

CLEAR CUT CHALLENGE

Imagine yourself with a pair of chopsticks, trying to catch a housefly. That's the thinking behind this game that tests your reflexes. A log rises up with a line on it. After a pause, which may be short or long, the log drops and you must press the A Button to try and cut the log on the line.

This is one of those games that you'll want to practice if you're having trouble hitting the line. Concentrate on where the

It's better to cut below the line, or early, rather than above the line, where you'll lose points.

line is, and imagine ten blocks in the log. A line in the middle is a 5, while higher or lower lines equal higher or lower numbers. Keep the number in mind as the log rises, and it should help with your cut timing when it drops. You must concentrate, Daniel-san.

If you can hit the line five times in a row, you'll receive a perfect score of 100.

Another important tip to keep in mind is it's better to cut early, or lower on the log, rather than later. An early cut will still gain you points if it's close, while a cut above the line will deduct points from your score.

THREE AGAINST ONE!

If your dice roll lands on one of the icons where the leader must give up coins to the other players, or the leader can't receive any coins, it's a prime time for the other players to gang up. If you have the option to choose the

Mini-Game played, choose one the leader has the least chance of winning, or one of the games where other players can gang up easier (Delibird's Delivery, Furret's Frolic, Gutsy Golbat, Topsy-Turvy).

The player with the most coins is the leader and wears a crown, but there are plenty of chances for the other players to catch up.

FURRET'S FROLIC

The goal is to knock the Poké Balls into your goal... but not just any Poké Balls. While you'll want to grab as many as you can, and at first only the smaller ones are released, once the larger Poké Balls appear, go after those! The smallest Poké Balls are only worth 1 point each, while the larger

their goal and jumping rapidly, but be sure to grab some points for yourself, too.

BARRIER BALL

There's more to this game than keeping the Poké Ball from getting past you. By moving your shield to the left or right as you hit the Poké Ball, you can put spin on it and slice it toward your opponent on either side, who may not be

PICHU'S POWER PLANT

Pressing the button rapidly is the first key to success in this game, but just as important is making the switch to the next electrode without losing any time. You have to press the correct direction on the Control Pad and the correct button (A or B) at the same time to make the switch smoothly. If you

lost valuable time against your opponents.

RAMPAGE ROLLOUT

To begin with, you can get a quick start by pressing the A Button the moment the starting gun fires. However, the lead position may not be the best position to be in during the majority of the race. Tornadoes can be vital to slowing down your opponents. Each time you cross the lap line you'll receive three tornadoes if you're in fourth place, two tornadoes in third place, one in second place, and none in first place. Press the A Button and you'll not only drop a tornado directly behind

you, but you'll also boost forward for a moment. It's good to hang on to one in case an opponent gets directly behind you, then you can drop it and gain some ground. When they hit your tornado they'll be brought to a screeching halt, but you can run over your own tornadoes without slowing down. Try to

Build a wall of tornadoes by placing them side by side, making it difficult for your opponents to avoid them.

save up three tornadoes on the last lap so you can drop them quickly, get a few speed boosts out of it, and hopefully cross the finish line first. Another great strategy is to drop a few tornadoes side-by-side during the race, building a wall your opponents will have to steer around, guaranteed to slow them down.

STREAMING STAMPEDE

There are five rounds to this counting game, which is one of our favorites. You can earn up to 10 points on the first two rounds, 20 points on the third and fourth rounds, and 40 points on the last round. If your count is off by one, you'll receive half points. If it's off by two, you'll receive 1 point in the first two rounds, 5 points in the third and fourth rounds, and 10 points in the last

three as we press the A Button (1, 2, 3... 1, 2, 3) since it's easier to keep count that way. Practice a few times and you'll find what works best for you.

TUMBLING TOGEPI

The winner of this race is usually the person who hits the most arrows, which boost you forward. There are some obstacles you can hit that'll slow you down, but if you need to hit them to get to the next arrow it's

usually worth it. If you miss an arrow you'll immediately stop rolling, and that's not good. As long as you're rolling, you can hop over logs or other obstacles, but bushes slow you down, and rocks bring you to a stop. There's no pattern to the tracks, but the arrows switch sides often, so be ready to get to the opposite side each time you hit one.

You want to hit as many arrows as possible to keep your speed up. Be ready to steer to the opposite side of the track after hitting each arrow, to hit the next one.

DELIBIRD'S DELIVERY

This Mini-Game has mounds of strategy. You grab presents from the bottom and take them to the conveyor belt at the top, while avoiding the Swinub running across the center of the room. The items each score varying amounts of points, with larger items scoring more points, except the diamonds, which score the highest. You can grab up to five items at a time in your bag, but the bigger items will make you walk

much slower to the goal at the top, making it more difficult to avoid the Swinub. Grabbing the same item repeatedly, either in the same bag or on separate trips, will gain you more points, up to a 5x score. As long as you keep grabbing

the same item, you'll continue to earn a 5x score, so an item worth 100 points will be worth 500 points each. If you grab an item you don't want, usually because it will stop your score multiplier, you can walk into a Swinub to drop it.

EGG EMERGENCY

A perfect score of 100 is possible, but you'll need to concentrate and have excellent hand-eye coordination to pull it off. We found the best method was focusing on the top of the screen and concentrating on the pattern of drop-

EAGER EEEVEE

Concentrate on the bouncing of the Aipom... most of the time you can tell when it's pulling up the basket because it'll break its pattern of bouncing. We couldn't find any pattern to when the monkey fakes raising the basket, or when the Pineco appears that causes you to sit out a round if you grab it. Having super-fast

COMPLETE GOLD & SILVER POKéDEX

THIS IS THE PLACE...

...to find all the information you need about your favorite Pokémon, and those you're trying to defeat.

The stats here represent the typical strengths of these Pokémon at level 100. There is a great deal of variation between different Pokémon of the same name, so your results may differ. To get an accurate baseline, we caught several of each Pokémon and averaged their stats out.

The TMs and HMs that each Pokémon can learn are listed. To get more information about what these moves do and where to get the TMs, see page 120.

TOP SECRET

GB TOWER UPGRADES

The GB Tower gives you the convenience of playing your favorite Pokémon Game Boy cartridges on your TV, but you can speed up the action in the GB Tower by completing various tasks. Imagine being able to run through a huge forest instead of walking slowly!

To get the Doduo Mode (double speed) from Red, Yellow or Blue, beat the Gym Leader Castle or Stadium Cups in Round 1. When you've done this you'll see a Doduo sticker on the Game Boy of the GB Tower.

To get the Dodrio Mode (hyper speed) from Gold or Silver, beat the area mentioned above. You'll see a Dodrio sticker on the Game Boy of the GB Tower when you've received this special mode.

SUPER MACHINE

If you can conquer the Elite Four and Lance you'll make a Super Machine appear that will let you choose one of your Pokémon, and teach him any move he can learn, including reviving any move you may have replaced with another move.

This must be a non-registered, non-rental set of Pokémon. The Super Machine will appear again each time you beat the Gym Leader Castle in either Round again, but it must be a non-registered, non-rental set of Pokémon.

NEW TITLE SCREENS

There are two alternate titles screens from the one you first see when you turn your Nintendo 64 on. To see the other title screens, you must learn all of the Cups in the Stadium Battles. There is a special screen after Round 1 and another after Round 2.

EARN SUPER-RARE POKÉMON

There are two Pokémon you can earn that have special moves they normally can't learn. You can earn a Farfetch'd with Baton Pass, and a Gligar with Earthquake. Both of these are earned when you defeat your Rival in a special battle. See the Rival Battles section at the end of the Stadium Cups chapter for more information.

SUPER COMBOS

Here are a few combos they didn't teach you in the Classroom. Use these for an extra boost against your opponent and they won't know what hit them!

DEFENDING AGAINST A COMBO

If someone is using a combo that includes the use of an item, you can use thief to try to steal that item.

CURSE

If someone who is not Ghost uses Curse, it makes their Speed go down but raises their Physical Attack and Defense. Therefore, if you use Double-Edge after you use Curse your Attack will be high but so will your Defense, so you'll take minimal damage.

Also, if you use an attack that attacks first like Extremespeed, Quick Attack and Mach Punch after Curse, it'll be a powered up attack, and the speed reduction caused by Curse won't be a factor. (Arcanine is the only one with Extremespeed)

QUICK CLAW

Slow Pokémon usually have Strong moves but don't attack first, so if you use Quick Claw you have a chance of going first.

PSYCH UP/ SWAGGER SWITCH-A-ROO

Use Psych Up so your opponent's moves that benefit their Pokémon's stats will also benefit yours. Psych Up copies opponent's current stats but not future ones. Use Swagger then Psych Up to confuse your opponent, and increase their Attack strength, which will also now increase your Attack strength.

ICY WIND/FLINCH COMBO

When you use Icy Wind, it lowers your opponent's Speed. Follow it up with moves that will make your opponent flinch, like Rock Slide and Stomp (since you should be able to go first).

SAFEGUARD AND CONDITION CAUSING ATTACKS

Use Safeguard before using attacks like Thrash, Outrage and Petal Dance, then you won't be affected by the bad effects of your own attack.

SCOPE LENS AND AN ATTACK THAT ALWAYS GOES FIRST

Scope Lens gives you a good chance of making a critical hit. Combine it with an attack move that goes first, which are usually not very strong, and you may score big with a critical hit.

RIVAL BATTLE

You can unlock a special battle arena in the bottom-right corner of the main map once you have earned all of the Stadium Cups in Round 1 or 2 and defeated the Gym Leader Castle. Inside you'll find your Rival waiting with three powerful Pokémon (Mewtwo, Lugia and Ho-oh). The good news is you get to bring in any six Pokémon of your choice to pound him into the ground. See the

end of the Stadium Battles chapter for more information on the Rival Battles.

MINI-GAME VERY HARD MODE

The Mini-Games in Pokémon Stadium 2 are a blast to play alone, against the computer, or with up to three of your best friends. When playing against the computer you can choose to play on Easy, Medium or Hard difficulty levels. If you play the Hard level against the computer players on a seven coin game, and win, you'll open up Very Hard Mode. Some of the games aren't much harder, but others become nearly impossible, like Egg Emergency and Topsy-Turvy.

SUPER TEAMS

We've listed our favorite teams to take into battle for the various Stadium Cups, Gym Leader Castle or one-on-one with your friends. You can use them or modify them by substituting in your favorite Pokémon. The key to a powerful team is diversity in abilities and diversity in Pokémon types. All are Level 100, but most will work with lower levels.
